

HI TECH PERFORMANCE HELMETS

2016
COLLECTION

100% MADE IN EUROPE WITH ENTHUSIASM

CMS Helmets is one of the last few companies operating in the helmet industry producing entirely in Europe specifically in Portugal. With more than thirty years of experience and dedication to motorcyclists safety standards have a legacy like few and want to continue the path of a constant evolution waging higher standards of quality, safety, performance and design.

Knowledge, enthusiasm and passion are the correct terminology that truly makes the difference, the launch of a real challenge for coming actions, that special blend of consciousness, experience and ability in a sector as specific as ours is.

Nothing else can leave such an indelible, important mark on the production of a basic safety item such as motorcycle helmet.

Lightness, innovative materials, ventilation, design, technology, climate control and comfort: these are the basis of our construction technique, all functional, deriving from a capital experience and careful expertise built into every single item of the CMS Helmets collection.

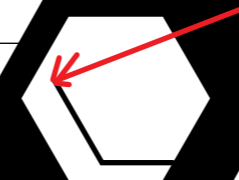

It is the skill and devotion of an exceptional team working together that has allowed our products to boast some of the world's highest safety standards, performance, design and best comfort fits.

Each and every one of our helmets captures the commitment of all our staff and collaborators, who all come together, motivated for perfection.

S-COM INTERCOMMUNICATION SYSTEM

S-COM intercom is CMS Helmets very own specifically design intercommunication system. S-COM system gives the possibility to connect to 4 intercom systems at the same time up to 1km. It's also possible to connect to any mobile device by Bluetooth. The S-COM also has Radio FM/AM.

LASER FINISHES

LASER FINISHES

CMS Helmets is known for its modern approach by applying the latest technology to enhance design using laser cut and engraved inner linings, exterior fabric and metal finishes.

NAC NECK ACTIVE COMFORT INNER LINER

NAC is an active inner lining system designed to provide the best neck support for a more comfortable ride achieving maximum comfort reducing the inner noise by blocking the wind.

NAC NECK ACTIVE COMFORT

B-ON MOTION

B-ON MOTION LED SYSTEM

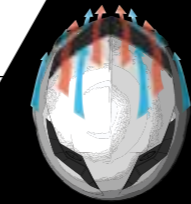

B-on motion LED System is an innovative light system, design by CMS Helmets to improve the rider visibility at night ride. The system works with a lithium battery with up to 7hours of use, chargeable by USB. The light as 3 mode: continuous, slow blinking and flashing.

EFR EMERGENCY FAST RELEASE SYSTEM

EFR is CMS Helmets emergency cheek pads release system. This system allows the removing of the cheek pad with the least effort as possible in case of crash.

E.F.R. emergency fast Release

HI SPEED STABILIZER REAR SPOILER

AERODYNAMIC REAR SPOILER

CMS Helmets design one of the first high profile rear spoilers with the intention of enhance the helmet aerodynamic properties. The spoiler stabilizes the helmet at high speeds by forcing the wind to flow in the right direction when in contact with the helmet upper surface.

WIND LOCK SYSTEM

WLS is the visor sealing system that consists in two pins in each side of the visor system giving the visor a final lock position to block the wind noise.

lock pin WIND LOCK SYSTEM

D.F.V. dynamic force ventilation

DYNAMIC FORCE VENTILATION

Dynamic force ventilation is the intake air system designed by CMS Helmets, where the intakes are made with low profile to just allow the right amount of air without the noise associated to bigger air intakes.

3D CUT CHEEK PADS AND ANTI NOISE EAR PADS

This system reduces the noise with thicker ears pads designed to allow the ultimate comfort and silent ride.

thicker ear pads

EASY CHANGE EASY TOUCH

EASY CHANGE MECHANISM

Easy change mechanism is the CMS Helmets easy visor release system, that allows the user to change the visor by pressing one button.

SUPERSPORT concept is an exclusively production platform developed to construct advanced multi fiber composite helmets! A hand-made engineering production upraises the performance level enhancing aerodynamic and ergonomic features. Optimized DNA composite fiber structure specially developed to achieve maximum lightweight and comfort even in high speeds. Designed from the racetrack for the racetrack without limits! Ready to display its competition character in total purity and freedom! More than just a concept, it's the ultimate SUPERSPORT racing concept!

Leonardo da Vinci once said "Art says the unsayable; expresses the inexpressible, translate the untranslatable". Motorcycle riding is the most intense way to experience your own movement. Every sense is flooded with impressions. The SPORT CONCEPT was developed to achieve pure motorcycle riding experience! The sports riding skill starts inherited of the true spirit of unrivalled comfort, perfect fit, aerodynamics and high quality build construction!

Thrilling contradictions! For those who prefer to blaze a trail of their own don't need to follow the lead of others. Developed to exceed intense road expectations. Practical but not ordinary! Characterized by a reduced volume and weight creates an intimate relationship with the user generating an intense driving pleasure and comfort even in long distances. The TOURING CONCEPT models are developed, tested and assembled keeping CMS Helmets philosophy of maximizing the sense of comfort and effective performance and safety. All the sports style and performance from the sport experience are added into everyday driving.

Sophisticated and innovative, the URBAN CONCEPT is the distinctive open face helmet designed to meet all the urban requirements. Every detail has been used to highlight what most matter to the users – stylishness, vanguard and safety! It's all about that one moment when you ride plenty of passion.

Developed to attack the muddy and dusty hills the OFFROAD CONCEPT offers lightweight helmets constructed in special thermoplastic resin. The maximum racing performance is obtained through the outstanding racing professional design, extreme comfort and aerodynamic structure.
